Zegers, P., 169

Subject Index of Volume 49

Air quality
  fuel cells and air quality: a California perspective, 209
Ammonia
  ammonia as a feedstock for a hydrogen fuel cell; reformer and fuel cell behaviour, 271
Anode gas recycling
  three-dimensional and time-dependent simulation of a planar solid oxide fuel cell stack, 333

California
  fuel cells and air quality: a California perspective, 209
Cathode materials
  development and characterization of novel cathode materials for molten carbonate fuel cell, 227
Ceramics
  oxygen transport and exchange in oxide ceramics, 1
Coal-fuelled fuel cells
  prospects for advanced coal-fuelled fuel cell power plants, 151
Commercialization
  commercial, environmental and legislative factors that influence the implementation of fuel cells, 193

Demonstration plants
  PAFC demonstration plants in Europe; first results, 63
Denmark
  combining science and practice in the Danish 'DK–SOFC' program, 291

Electrolytes
  fuel cell electrolytes: evolution, properties and future prospects, 15
Environment
  fuel cell road traction: an option for a clean global society, 169
  commercial, environmental and legislative factors that influence the implementation of fuel cells, 193

Field trials
  philosophies and experiences of PAFC field trials, 77

Fuel cell electrodes
  the kinetics of electrochemical reactions on high temperature fuel cell electrodes, 257
Fuel cells
  fuel cell electrolytes: evolution, properties and future prospects, 15
  fundamentals of fuel cell system integration, 37
  landfill gas pretreatment for fuel cell applications, 143
  prospects for advanced coal-fuelled fuel cell power plants, 151
  fuel cell road traction: an option for a clean global society, 169
  commercial, environmental and legislative factors that influence the implementation of fuel cells, 193
  fuel cells and air quality: a California perspective, 209
  parametric modelling of the performance of a 5-kW proton-exchange membrane fuel cell stack, 349
Future
  competing power-generating technologies for the 21st century, 185

Hydrogen fuel cells
  ammonia as a feedstock for a hydrogen fuel cell; reformer and fuel cell behaviour, 271

Landfill gas
  landfill gas pretreatment for fuel cell applications, 143
Legislation
  commercial, environmental and legislative factors that influence the implementation of fuel cells, 193

Methane-steam reforming
  three-dimensional and time-dependent simulation of a planar solid oxide fuel cell stack, 333
Methanol
  utilization of methanol for polymer electrolyte fuel cells in mobile systems, 299

Molten carbonate fuel cells
systems' optimization: achieving the balance, 53
development and characterization of novel cathode materials for molten carbonate fuel cell, 227
pack aluminization of nickel anode for molten carbonate fuel cells, 245
a simulation model for integrated molten carbonate fuel cell systems, 283

Nickel anode
pack aluminization of nickel anode for molten carbonate fuel cells, 245

Oxygen
oxygen transport and exchange in oxide ceramics, 1

Pack aluminization
pack aluminization of nickel anode for molten carbonate fuel cells, 245
Parametric model
parametric modelling of the performance of a 5-kW proton-exchange membrane fuel cell stack, 349
Phosphoric acid fuel cells
PAFC demonstration plants in Europe: first results, 63
philosophies and experiences of PAFC field trials, 77
Polymer electrolyte fuel cells
utilization of methanol for polymer electrolyte fuel cells in mobile systems, 299
Power-generating technologies
competing power-generating technologies for the 21st century, 185
Production cost estimation
production cost estimation of solid oxide fuel cells, 315
Proton-exchange membrane fuel cells
parametric modelling of the performance of a 5-kW proton-exchange membrane fuel cell stack, 349

Solid oxide fuel cells
global SOFC activities and evaluation programmes, 103
combining science and practice in the Danish 'DK–SOFC' program, 291
production cost estimation of solid oxide fuel cells, 315
three-dimensional and time-dependent simulation of a planar solid oxide fuel cell stack, 333
Solid polymer fuel cells
water management and stack design for solid polymer fuel cells, 117
status of solid polymer fuel cell system development, 129
Stack design
water management and stack design for solid polymer fuel cells, 117
System development
status of solid polymer fuel cell system development, 129
System integration
fundamentals of fuel cell system integration, 37
Systems optimization
systems' optimization: achieving the balance, 53

Transportation
fuel cell road traction: an option for a clean global society, 169

Vehicle propulsion systems
utilization of methanol for polymer electrolyte fuel cells in mobile systems, 299

Water management
water management and stack design for solid polymer fuel cells, 117
